

Business Plan

2025–2026

AI-accelerated web design for small businesses. Agency quality. Freelancer price. Delivered in days.

SAOS Studio

hello@saos.studio · saos.studio

Prepared: April 2025 · Confidential

Executive Summary

Mission: To democratize beautiful web design by combining artificial intelligence with human creative direction — delivering professional websites in under a week from €350.

The Opportunity

Millions of small businesses operate with outdated, broken, or nonexistent websites. Traditional agencies charge €3,000–€10,000 and require 6–8 week timelines. DIY builders produce generic results that fail to build trust. There is a massive gap for fast, affordable, high-quality web design.

The Solution

SAOS Studio uses AI to accelerate the design and coding process by 80%, then applies senior human designers to refine the final 20% — spacing, typography, animation, and brand voice. The result is a website that looks and performs like a €10,000 agency build, delivered in 2–7 days.

Financial Snapshot

METRIC	YEAR 1 TARGET	YEAR 2 TARGET
Revenue	€30,000	€75,000
Projects Delivered	72	165
Average Project Value	€420	€455
Operating Margin	~75%	~80%

Funding & Capital

This is a bootstrapped operation. Initial costs are under €500 (domain, hosting, tools, branding). All growth is funded by revenue. No external capital required.

Business Model

Revenue Streams

PACKAGE	PRICE	DESCRIPTION	MARGIN
Static	€350	Single-page custom design, build, and deployment	~85%
Premium	€500	Static + Google Analytics integration + 2 additional pages	~80%
Maintenance	€99/mo	Hosting, updates, small changes	~90%

Cost Structure

- AI APIs (OpenAI): ~€30–€60/month depending on volume
- Email infrastructure (Resend): ~€10–€20/month
- Domain & hosting: ~€20/month
- Lead data (SerpAPI / tools): ~€50/month
- Design tools (Canva Pro, etc.): ~€15/month
- Miscellaneous: ~€25/month

Total monthly overhead: ~€150–€200. Break-even at **1 project per month**.

Competitive Advantage

1. **Speed:** 48 hours to 7 days vs. industry standard 4–8 weeks
2. **Price:** From €350 vs. €3,000–€10,000 agency average
3. **Quality:** Hand-finished by designers; no templates
4. **Process:** One 15-minute brief call. No bloated meetings
5. **Tech:** Clean, fast code. No WordPress bloat or plugin dependencies

Market Analysis

Target Market Size

In Europe alone, there are approximately **25 million small businesses**. Estimates suggest 40–50% either have no website or operate with a severely outdated one. This represents a serviceable market of **10–12 million businesses**.

Customer Segments

SEGMENT	NEEDS	WILLINGNESS TO PAY	ACQUISITION
Local Service (restaurant, salon, clinic)	Credibility, bookings, contact	€300–€600	Google Maps outreach
Solo Professionals (lawyer, architect)	Trust, portfolio, authority	€400–€800	LinkedIn, referrals
Early Startups	Validation, landing pages	€200–€500	Online communities
Trades (plumber, builder)	Local SEO, leads	€300–€500	Local directories

Competitive Landscape

COMPETITOR TYPE	STRENGTHS	WEAKNESSES	OUR EDGE
Traditional Agencies	Full service, strategy	Expensive, slow	10x cheaper, 5x faster
Freelancers (Upwork/Fiverr)	Cheap	Inconsistent, slow	Reliable process, premium quality

DIY Builders (Wix, Squarespace)	Low cost, easy	Generic, time-consuming	Done-for-you, custom design
AI-only tools	Instant, cheap	No human touch, off-brand	Human refinement, brand alignment

Marketing & Sales Strategy

Primary Channel: Direct Outreach

Our "Draft First, Sell Second" system identifies businesses with poor/no websites via Google Maps, generates a custom AI homepage preview for their brand, and sends a personalized email with a live preview link. This turns cold outreach into a warm demonstration.

Target: 50 emails/day → 2–5% reply rate → 10–20% meeting conversion → 50% close rate
= 1–2 deals/week from outbound alone.

Secondary Channels

- **Local SEO:** Google Business Profile, local keywords, reviews
- **Social Proof Flywheel:** Instagram/LinkedIn before/after posts
- **Referral Program:** €100 credit per successful referral
- **Partnerships:** Accountants, coaches, business consultants (15% commission)
- **Content:** Blog posts comparing agency vs. AI design costs

Sales Process

1. **Discovery Call (15 min):** Understand goals, content, timeline
2. **Proposal:** One-page scope + price confirmation via email
3. **Deposit:** 50% upfront to begin
4. **Draft Delivery:** AI-generated draft within 24–48 hours
5. **Revision Round:** Client feedback, designer refinement
6. **Final Payment:** 50% on approval
7. **Launch:** Deploy, connect domain, handover

Operations & Technology

Workflow

Each project follows a 4-step process: **Discover** → **Draft** → **Refine** → **Launch**. AI handles the heavy lifting of layout generation and initial code. A senior designer reviews every pixel before delivery.

Technology Stack

LAYER	TOOLS
Design Generation	OpenAI GPT-4, custom prompt engineering
Frontend	HTML5, CSS3, vanilla JS (no frameworks for speed)
Hosting	Netlify, Vercel, Cloudflare Pages
Domains	Namecheap, Cloudflare
CRM	Notion, custom JSON database
Email	Resend, Google Workspace
Analytics	Google Analytics, Plausible

Quality Assurance

- Every site tested on mobile, tablet, and desktop
- Google PageSpeed score target: 90+
- Accessibility baseline: semantic HTML, alt tags, contrast ratios
- Cross-browser compatibility: Chrome, Safari, Firefox, Edge

Capacity Planning

With current workflow, one operator can manage **8–10 projects per month**. At scale, we hire contract designers for refinement work while the founder manages discovery, AI prompting, and client relationships.

Financial Plan

Revenue Projections (Year 1)

MONTH	PROJECTS	AVG VALUE	REVENUE	COSTS	NET
1–3	4	€380	€1,520	€600	€920
4–6	12	€400	€4,800	€600	€4,200
7–9	24	€425	€10,200	€800	€9,400
10–12	32	€450	€14,400	€1,000	€13,400
Total Y1	72	€430	€30,920	€3,000	€27,920

Risk Factors & Mitigation

RISK	LIKELIHOOD	MITIGATION
Low reply rates on cold email	Medium	A/B test subjects, improve preview quality, add LinkedIn touch
AI output quality inconsistency	Medium	Refine prompts, add manual review gate, client sees draft before build
Scope creep	High	Fixed packages, clear SOW, paid revisions beyond scope
Competitor price undercutting	Low	Emphasize quality and speed; avoid competing purely on price
Client non-payment	Low	50% deposit required; final delivery after final payment

Team & Milestones

Current Team

ROLE	RESPONSIBILITIES
Founder / Designer	Strategy, client discovery, design refinement, brand direction
AI Systems (automated)	Draft generation, code scaffolding, asset creation

Hiring Roadmap

- **Month 6:** Contract designer (refinement + overflow)
- **Month 9:** Part-time sales assistant (outreach + scheduling)
- **Month 12:** Full-time junior designer or developer

12-Month Milestones

MONTH	MILESTONE
1	First 4 clients closed. Systems operational.
3	Recurring revenue stream launched (maintenance €99/mo).
6	First hire. Portfolio of 20+ projects. Inbound leads begin.
9	€5,000/month consistent revenue. Referral program driving 20% of leads.
12	€7,500+/month. 2 team members. Recognized local brand.

Exit & Scale Options

- **Productize:** Launch a templated "SAOS Kit" for DIYers at €99

- **Agency Model:** Expand into SEO, branding, and paid ads
- **Acquisition:** Attractive to marketing agencies seeking AI workflows

Closing Statement: SAOS Studio is not a cheap web design shop. It is a precision tool for small business owners who want to look like they spent €10,000 without actually doing so. Our moat is speed, taste, and relentless execution. The market is enormous. The time is now.
